

Testing out Knitr on a Markdown document.

Buenas dias!

```
x <- cumsum(dchisq(1000,5))  
plot (x, type = "l")
```

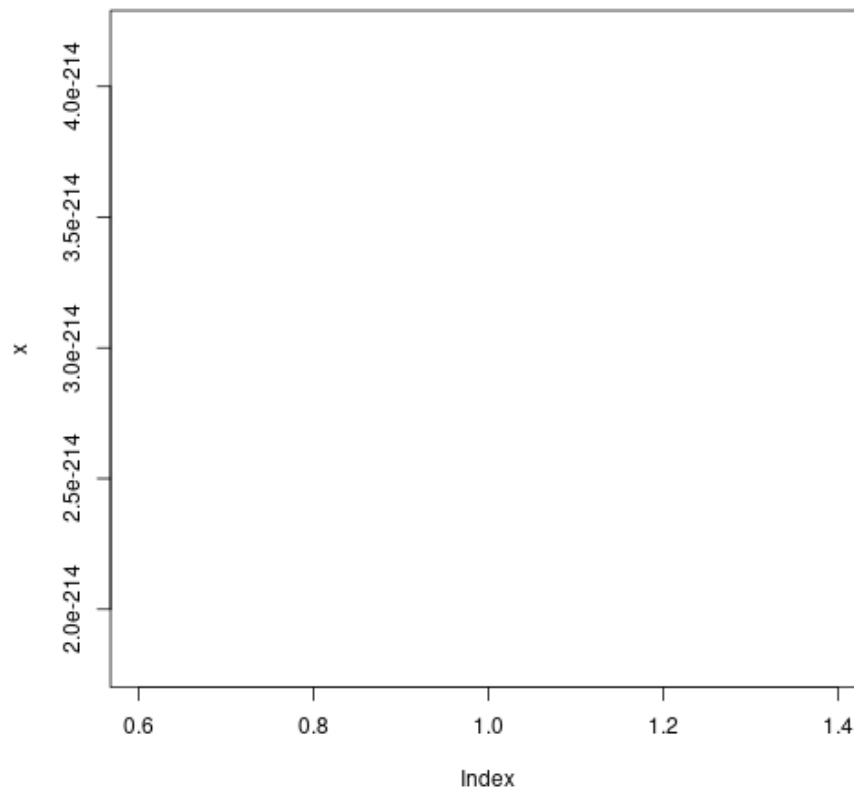

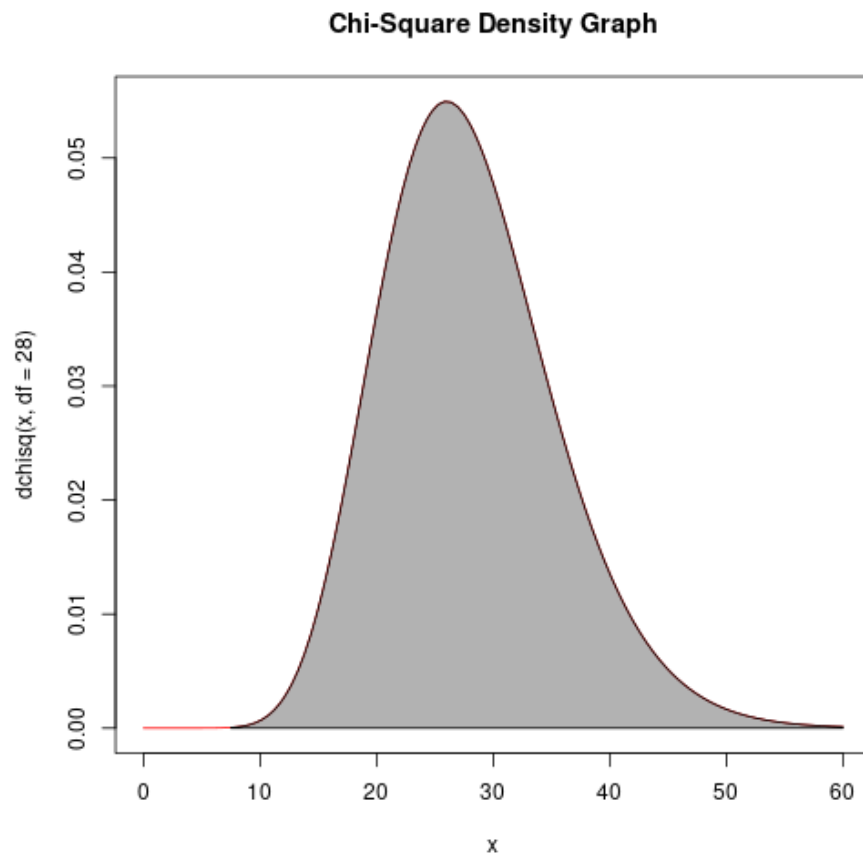

Figure 1: plot of chunk Dork-Squared

```
curve( dchisq(x, df=28), col='red', main = "Chi-Square Density Graph",  
       from=0,to=60)  
xvec <- seq(7.5,60,length=101)  
pvec <- dchisq(xvec,df=28)  
polygon(c(xvec,rev(xvec)),c(pvec,rep(0,length(pvec))),  
       col=adjustcolor("black",alpha=0.3))
```

Thanks Stack Overflow for the code.
Adios!
